Special Notice to Business Men. As an aivertising paper, the Democrat is unl-ersally regarded as the established medium of business communication between the buyer and seller; its largely increasing circulation, both at home and abroad, offers a favorable opportunity for a judicion's dissemination of mercantile intelligence. It is also a favorite family journal, heuce retail dealers, as well as more extensive trades-people, mechanics and citizens will find its columns essential to prosperous business.
It stands at the head of one of the great parties

of the country, reaching thousands that no other medium does reach. Now that the "Fall Campaign" is drawing upon us, we hope they will not fail to learn the facilities our paper affords them, but at once avail themselves of its advantages, which earpassauything In its former history. vard, as a means of profit over the old charge of

REMEMBER THE GRAND MASS MEETING AT LEXINGTON, KY .. ON THE 23D INSTANT!

The organ is at last reduced to two pointsthe charge of disnnion against the Democratic party, and the yell about frauds. The charge that any of the Democratic party are in favor of disuplon is simply false; but if the determination not to submit to Abolition sectional domination in the Union makes a man a disnuicuist, there are plenty of them in the Democratic party. Thoy intend to have the Union as it has been, and as it now is, or not at all. We are fighting for the Union our fathers made, and we want uo other In this position we have the indorsement of Mil lard Fillmore. He justifies the South in refusing to submit to sectional domination, and couse quently all genuiue Fillmore men do likewise for they proudly proclaim that he is their platform. We have proved, by Mr. Fillmore's own words, that he is heart and soul with the South, when she refuses to submit to Abolition sectional

The editor of the Journal modestly denies the soft impeachment that he has all the brains of his party; for there are others he mentions, and amongst them Millard Fillmore. Now, Fillmore is not one of his party-repudiates the very hobby he is riding. Mr. Fillmore says the South will not submit to the domination of Fremout & Co. He tells his admiring hearers that they would not submit to such a despetism, and that those who expect the South to submit will find themselves mistakes. This is Fillmore's position, proclaimed and applauded by the true friends of Fillmore. We, therefore, inform the Jonrnal that he and Fillmere are rnnning ou opposite lines, instead of co-operating with each other. Fillmore is with the men who intend to resist sectional domiustion. He says the South will do it, and that the North would do the same thing. So much for the charge of disunion against those of the South who counsel disprion, rather than submission and degradati u. Mr. Fillmore is one of them. He so stands on the record, not hastily or rashly, but deliberately. He placed himself there with the eyes of the nation upon him, knowing the responsibility under which he spoke.

As to the charge of frauds, every Democrat knows the charge to be false; and the railing of the organ can only he intended to affect his own party. His object is to excite them to a pitch of violent excitement. He wants to apologize and excuse the atter overthrow of his party. He has repeatedly, and with dogmatic coundence, assured his readers that all was right; they have bet their money on the credit of his assnrances, and they are about to lose it. It is, therefore, of the last importance to his credit with his party, to make them believe that some stupendous frauds are perpetrated, and that he was all the time right; but his calculations were upset by frauds.

admit that the charge was true. He showed, and proved from the record, that the American party lu the Northern States had elected to the present Congress ninety members, eighty-four of wh m voted for Banks for Speaker; that they had elected the Governors, all of whom were Abolitonists, and ten Senators, all of the same stripe; and that, at this very moment, the American party, in all the free States, had uo candidates for any local office, but were united heart and hand with the Fremont party to crush down the National Demicracy; and white thus united and acting, the editors of the leading K. Nothink journals in Kentucky were bidding them God speed in their unboy purpose; that while the Northern fanatic was engaged in the work of ruin to the Constitution, and the complete subjection of the South to their dictation and supremacy, these same editors looked on with approval, and shouted with fendish triumph when they saw their black allies the viocers of the field. Such was the case when the Democracy, battling for the rights of the South in Maineand Vermont, fell in the contest. The man in the Bouth who would do this, would stand by and hold the torch for the incendiary to see fire to the dwelling of the slaveholier, and cance around the burning pile as the shrieks of the victim went up to Heaven in agony and death. There was not a Knew-Nothing present wha did not hang his head in shame, and blush to feel that the charge was true. When he showed that the Americau party in their patform, had refused to use the word slave or slavery, but had struck out the only section or resolution containing it, by a direct vote in their February convention oil Sor striking out, to 41 against it. He turned in scathing rebuke, and asked, had it come to this, that the word slave or slavery was to be struck from the vocabulary of the South, as a term too offensive and odious to be repeated in public or whis prefer in private? Areyon children to be tawpit to loathe it, and turn away when hi is whispered, lest it stain their species s It has become marvelous that men have been seen traveling our public highways with black carpet hags and axes; large numbers have been seen; as the lad saw a hundred cats. The strange phenomenon is every day seen in this city, but now it is a wenderful mare's nest. According to the editor's cypheriug, five or six thousand of these vagabonds have been sent into the State, in ose of every true tover of the weak of two Know of two coming context. We know of two Know of the coming context we know of two know of two know of two knows of two contexts gangs, at this early period. Of course each vagabond would cost not less than fifty dollars; he conidu't travel and live ou less; so here are two hundred and fifty or three hundred thousand dollars expended to huy up votes, that every Democrat knows are not wanted. All the risks of detection, exposure, and failure, are incurred, with an euormous investment of an amount of money that could not be raised in the United States, to carry this or any other State. This iucredible and ridiculous falsehood is made the basis of dally tira 'es to a party of stu; ids.

We have no doubt the Know-Nothing party meditate frauds, but even they are not stupid enough to employ their spare change in such an absordity as this. They will find cheaper and

slyer projects than this. We denounce the whole story as lies and slanders. We knew they are lies; and we are The vast on course having satisfied their honger, the bell was rung (the stand being in the raar of the Court house yard), and Mr. W made his appearance in order to fluish his speech; during which time the gifted Wool, y whose praise is in the mouth of every true Demoarat in the country, made his advent amid the shoats and the shoats and the shoats of the cult reassembly, suddened to the shoats and the work of the cult reassembly, suddened to the shoats and the work of the cult reassembly, suddened to the shoats and the work of the cult reassembly, suddened to the shoats and the work of the cult reassembly, suddened to the shoats and the work of the cult reassembly, suddened to the shoats and the shoats are should be should have, Andstond the the cult will be considered to the shoats of th satisfied that they are unprofitable lies; but as it is new the last remaining capital of a miserable faction, that was born at mlduight, uurtured iu secrecy and deception, we are not surprised at any monstrosity its godfathers may perpetrate. Forgeries and lies may be looked for, but they will prove unavailing; the voting of Tnesday last shows that the sober second thought of the masses is quite equal to the task of saving the country from desperate schemers, that have no motto but rule or rnlu. They have made every desperate shift to catch the breeze; steered to every point alert. of the compass, until they have disgusted all seusible meu, and now want the rest of mankind to believe that frauds are needed to beat them. They cau't afford to coufess that they have made themselves contemptible, and lost all support. At the same time, they want the world to believe that they only can save the Union. This is about the they only can save the Union. This is about the last exploit of faction, when it wants to crawl into power. Having tried everything else and failed, it sets itself up for Uniou saving, and expects to recommend itself by that nestrum. Now, the best service they could do the Union would be to turn by the service they could do the Union would be to turn. service they could do the Union would be to turn against it; for peopls now generally believe that they are after no good; and therefore the Union would be stronger, in the hearts of the people, with them against it. Let them turn against the 23d, 24th, and 25th, of October. On the 23d, at Union, and it is safe; for they are certain to fail in their objects and purposes. PROF. MAPES .- This gentleman is doing per haps more in applying scientific principles to practice in agriculture, thau, perhaps, any other man in this country. He has been one of the best abused men in it, but he seems to he well sus tained in his peculiar views; he appears to command the confidence and respect of nearly all who came in contact with him, touching agricultural matters. A few years ago he hought a poor, worn-ous tarm in New Jersey, and by the application of science, he has not only made an excelleut farm of it, but has made money by it. He believes in Laber and deep plowleg. At a late Indianapolis, evening .- The returns come in | meeting of the New York Farmer's Club, at which is generally the chief speaker, he spoke fave ably of the new sngar plant introduced into this ountry-the Sorghum or Sugar Millet. It is growing finely at his place, and so is every other ant, quaffected by dronth, whorever the ground as been underdrained or deeply sub-soil plowed. His feuce seems a liue of demarkation between green fields and those parched and brown of his eighbors. He contends that the prevention of injury from drouth is in the hands of every farmer. Flat culture of all crops is his rule, and horse-hoeing his practice. His potatoes so worked are very fine this year, and his dwarf pears, specially manured, are unusally good, and have not suffered in the least from drouth. He also stated that he rarely used a hoe on his farm; eve rything is done by machines drawn by horses, or, what he greatly prefers, mules. He has one mule said to be about fifty years old, that will walk between two rows of carrots, twelve luches Vaudeburg 450, Pike 157, Martin 250, Hancook

RAISING INDIAN CORN WITHOUT TILLAGE AF TER PLANTING .- This has been attempted successfully by a correspondent of the Tenuessee Farmer

writing under date of April, 1856. He saye: Last spring I planted a small piece of poor ground—first breaking it up woll. The rows were made three feet apart, and the stalks left about oue foot apart in the drill. The ground had heen very foul the previous year with orah grass. The orn was not well up before the grass hegau to ap-

pear. Whou the coru had about four hlades the young grass completely covered the ground, and the corn was turning yellow. I spread a small quantity of stable maunre around the cern, and deep with leaves from the forest, taking care to do this when the ground was wet, and the leaves also that they might not be blown away, and to leave the tops of the young corn nucovered. In ten days there was not a particle of living grass to be l'ound; and the corn had put on that deep bluish green which always denotes a healthy condition

that plant. From the day the corn was planted until after From the day the corn was planted until after the fodder was pulled and the tops cut, uothing more was done with it; and the result is a product at the rate of forly-two bushels to the acre. I uoted in the course of the summer the following facts: First. The corn treated thus was always ahead of some planted alongside of it, and treated in the usual way. Second. It riponed at least ten days sooner than other corn planted at the ten days sooner than other corn planted at the same time. Third. The hottest and driest days the which anged, the Democratic majority will be lades never twisted up, as did other corn in the neighborhood. Fourth. In the driest weather on removing the loaves, the ground was found to he molet to the surface, and loose as deep as it had head first broken up. Fifth. The heaviest rains had scarcely any effect in washing away the soil or making it had.

had scarcely any enect in was large way to be of making it hard.

It eertainly will require less laber to produce oorn in this way than in the usual mode. And even if it required more, we have the consolation to know, that while by the ordinary method every hour's work is an injury to the land, by this mode it is making it better; for few things are better manure than the coasing of leaves put on in summer, if they are plowed in during the winter or spring following.

There is one very important result that must follow the success of this plan on a large scale, and it was with an eye eniefly to that result that my experiment was undertaken. Constant excuse for not improving our land is that where cotton is grown the time necessary first to cultivate the growing con properly, next to eather it and

ton is grown the time necessary first to cultivate the growing crop properly, next to gather it, and then prepare for a new crop—attended frequently by juclement weather—leaves the planter uo time to collect and prepare mannre. My plan will put an end to that excuse at once; for wheuver leaves are to be had, half the time ueually bestowed on working the corn crop in the usual way speut in gathering leaves and putting them on the ground, justed of plowing it, may in a short time accomplish everything that can be desired in the way of manuring.

This deserves attention. It shows the great alue of mulching, and if this mode can be purued economically, as the writer believes, the results must be very important; we can cultivate field of corn by manuring cheaper than we can without—we get paid for manuring the land in the nount of labor saved in ordinary tillage.

Mechanies' Institute Fair.

The throng at the fair of the Mechanics' Institute was larger than u on any previous occasion during the season. We warn pleased to witness the presence of large numbers from the country who appeared to take a lively laterest in the dis play. The most attractive object on exhibition seemed to be

"THE LITTLE JOBBER," contributed by W. N. Haldeman, Esq., of the Courier office. As a specimen of the power-press, for the purposes intended, the Little Jobber has no equal, and the rapidity with which it throws off printed sheets is truly astonishing. We im magine that, if Dr. Franklin could revisit us, and witness the operation of Mr. Haldeman's new printing apparatus, his first impulse would be to express an involuntary whistle, regardless of the

MESSES. BAYMOND & PATTON, also contribute materially to the interest of the exhibition. Many persons are not aware that the perfamer's art is carried on to such perfection i Louisville as it is, and as may be seen by an ex amination of the contents of a case deposited by Esymond & Patton. We cannot detect any differ ence between these Louisville made goods and the thm fair, that three bottles of cologne deposited for exhibition have been entirely used up by some thoughtless visitors. Housekeeper: will find sevoral other neeful articles in this care, among them the st ve and grate varnish, which actually makes an old stove lock as well as a new one. Also, the London Yeast Powder, which is so very popular am ng those who have tried it.

ORNAMENTAL MAIS BRAIDING Some really beautiful specimens of ornamental hair-work are upon exhibition, contributed b Majame Zwick, of Cincinnati. It is wonderful t witness the extent to which this lady has carrie her d flight art, and it would be d flight to con wrought without giving them occular demonstra tio . Madame will remain i. this city during the pre ont wook, after which time her adress will be the northwest corner of Fourth and Main streets Cincipusti, from which place she will fill orders chearly and expeditionely.

The ball of the Mechanics' Institute will be the point of attraction to night.

PREMITH STOLK MILL.-There was considers ble exostement yesterday on the Fair Grounds during the tost of superiority between the " Lit tle Giant" and " Brand's Premium Stock Mill." The Little Gient was fairly distanced, however by Brand's Mill, which la'ter exceeded the form er, in twenty revolutions, four thousand pound-Mr. Brand has taken the premium over the Little Giant, we believe, in every instance in which they have met, and, although the Little Giant has had a deservedly high reputation, Mr. Brand has given an invention to the country which is far supe-

This mill combines three principles-that entting with several steel blades, with that o crushing and grinding. It is beavier and stronger and less liable to break or get out of repair, than any other mill before the public. It is more easily adjusted, heing set course or fine by a sin zle screw, which may be donn by a boy ten year old. It may be need for cutting and grinding apples, turnips, bests, and rutebagas; and with 4 small additional expense, will cut and grind corn with salues, which can be done by no other mill extant. And finally, it has greater grinding enriace, and will grind finer, faster, and easier than any other mill of the same size in nre. I: is furnished complete, with sweep book and ecrews, and any farmer with his augur and axe

can set it up and have it grinding in haif an honr Mrs. Hagkins and Trainer, of the City Foundry on Main street, nour Preston, have established : manufactory of Brand's Stock Mills in this city. and those interested should avail themselves of an opportunity to inspect this great agricultural

RATE BOAD COUNTY BONDS FOR DRY GOODS. Mesers, Garvin, Bell & Co. will soll one hundred the neare' dellars in dry goods, payable in county bonds to the Lonisvillo and Nashville Railroad. This is an item of some importance to the public and may facilitate in converting to cash at their market valuabonds now dormant to the company. Holders of such bonds who wish to consider the proposition will find in the establishment of Garvi.4, Boil & Co. one of the largest stocks from which they can make up a complete assortment for

OUTRAGES IN THE SUNUES !- We are informed by a reliable gentleman who lives on Third street, beyond Broadway, that certain drunken vagabonds committed gross excesses in that neighbormood on Tnesday. They were very insulting toward unprotected citizens, and made several asesults upon females end aged men. Their parientar ire seemed to be excited against the Germans, whom they insulted and assaulted without stin'. It is greatly to be deplored that this class of villains cannot be brought to justice.

JEFFERSON CIRCUIT COURT .- Commonwealth VB. N. J. Basler, Esq. Basler was indicted for forgery; the case was continued for a long time, in order to enable Mr. Basier to procure some papers from Europe. Mr. Basier finally obtained his papers, and they clearly showed that he had the right to sign the name to the paper hn was charged with forging; and so soon as the Commonwealth's Attorney, Mr. Craig, examined the papers, he ordered a nolle procequi, and Basler was discharged.

MICHAEL ALLEN .- This notoriously bad individual was arraigned before the Police Court yasterday on a charge of assanit upon a German shoemsker and his wife, np town. He had gone into a shoe store and selected a pair of boots, and was making off with thom without paying. When asked for the money, he pitched into the shoemaker and his wife and beat them unmercifully. In default of \$200 bail he was sent to the work-house three months.

A Cool Young Man .- James Gordon was arrested on Tuesday as a vegrant, for disorderly conduct, and for carrying concealed weapons, and John D. Mitchall, John Sanders, Wm. F. Powell, was before the Police Court yesterday. He had John and Henry, slaves, for fighting, J. Mitchell, driven a widew and her children out of their own and E. B. Stephens. house, and taken possession of their bed and board. The ejected family was found by the watchman rossing about the streets. He was held to bail in the sum of \$200 for four months.

THE BUNKAN TABLEAUX. - This fine work of art which has been on exhibition at Mezart Hall for several days past, will positively remain but two mitted to jall to give his master an opportunity to nights longer, Friday and Saturday. There will reclaim him. be an exhibition for schools and families on Sat-

mrday at 3 o'clock, and to-night at the usual hour EXTRA PREMIUM FOR FAT CATTLE, -The butchers effer a premium of a \$25 gotlet far the beet ave fat cattle, to be exhibited at the Southwest-ern Fair Grounds on Saturday.

Routh Wastorn Patr.

Nothwithstanding the continued unfavorable eather, the attendance at the fair of the Southwestern Agricultural and Mechanical Association, esterday, was a decided improvement upon that of the first day. Kentnekians nvinced yesterday that they possessed a public spirit and enterprise altogether superior to the worst weather, and the boauty and gallantry which reminded one of "old House, New York. days." If we have a return of pleasant weather so-day or to-morrow, there will be a throng of visiters upon the grounds until the close of the fair, which will cause the friends of the association to forget the reverses of the first two days. The ispley of stock, yesterday, was equal to that of any former occasion. In the horse and sheep rings were some specimens which we have never sen exceiled.

The awards of premiums for articles exhibited the first day were not made out until yesterday. We place them upon record this morning :

Every item of furniture, bedding, and, indeed, the building throughout, is atted up with articles expressly mannfectured ior the honse.

Bituated as the St. Charles is, immediately at the landing of the principal shipping point for Louisville, where nearly all of her stranger guests first arrive and from whence they depart for the West and South, this honse affords a convenience and comfort to the traveler heretofore not experienced at this point.

It shall be the earnest endeavor of the proprietor of this establishment to command a liberal share of public patronage, because he intends to deserve it. The honse, with its extensive grounds, oool, shady graves, and general conveniences, is unsurpassed as a transient house.
